

February 13, 2024

Weather:

- Rain finally ended in the southeastern United States Monday, but only after four-day rain totals varied from 2.00 to 7.18 inches from Tennessee and the Delta to Georgia and western and southern South Carolina
- Next rain event in U.S. southeastern states is expected Friday into the weekend and will occur mostly near the coast coming out of Texas Friday and moving through southern Alabama and northern Florida to Georgia and South Carolina with another 1.00 to 3.00 inches possible; areas to the north will not be as significantly impacted as this past weekend.
- Western Australia has seen bouts of heat in recent weeks and this will continue in the west for another week with extreme highs of 100 to 111 Fahrenheit periodically over the next few days and then extremes of 108 to 118 will be possible late this weekend into early next week. Some of this heat will reach South Australia briefly early next week
- Argentina is a little drier in today's outlook over the next ten days to two weeks relative to that of Monday, but after recent rains of significance has fallen crop conditions should manage the situation well
- Brazil will get timely rainfall in most production areas, although there may eventually be a few pockets of excessive moisture.
- Bitter cold in Russia this week will shift to China next week while moderating somewhat; no winter crop damage is expected in Russia due to abundant snow cover; temperatures in China will not likely be low enough to threaten crops, although freezes will come tom the Yangtze River Basin where rapeseed is still semi-dormant today
- India would benefit from more rain, but little is expected; no extreme heat is likely.
- California will turn stormy again this weekend into early next week
- West Texas will be dry for at least the next ten days as will be many U.S. hard red winter wheat production areas.

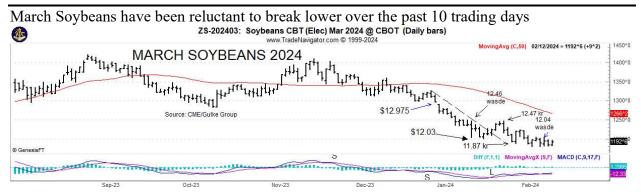

News:

- Grain traders reported 68,000 mt of South African or South American origin feed Corn was bought by the Korea Feed Association in a privately negotiated deal today. They also reported that Jordan's state grain buyer bought a total of 60,000 mt of optional origin mill Wheat.
- The Feed Leaders Committee from South Korea bought up to 60,000 mt of optional origin Soymeal. Origins accepted included the US, China, Argentina, or Brazil.
- The Malaysian Palm Oil Board data for January pegged January production at 1.402 mln mt, down from December's revised 1.550 mln mt. Analysts had estimated January production at 1.367 mln mt. The end of January stockpiles at 2.019 mln mt, down from December's revised 2.290 mln mt. Analysts had estimated January stocks at 2.139 mln mt. January exports at 1.350 mln mt, down from December's revised 1.362 mln mt. Analysts had estimated January exports at 1.219 mln mt.
- Dr. Cordonnier cut his Brazilian soybean crop estimate 2 MMT to 147 MMT, noting continued disappointing yields as harvest progresses. Cordonnier lowered his Brazilian corn crop forecast 3 MMT to 112 MMT amid lower plantings for first-crop corn and expected smaller safrinha seedings. In Argentina, he cut his soybean and corn crop forecasts 2 MMT each to 50 MMT and 54 MMT, respectively, as recent heat and dryness stressed crops in the core production area. Cordonnier still expects total South American soybean production to rise 12.2 MMT (6.1%) from last year but now forecasts corn production will fall 5.1 MMT (2.9%).
- The French farms ministry lowered their 2024 winter wheat harvest area to 4.36 mln hectares down from their previous 4.49 mln hectare estimate. The country's Durum Wheat harvest area was raised slightly to 210,000 ha from the previous forecast at 205,000 ha.
- U.S. oil output from top shale-producing regions will rise in March to its highest in four months, the U.S. Energy Information Administration (EIA) said in its monthly Drilling Productivity Report. Production from the top basins will rise by nearly 20,000 barrels per day (bpd) to 9.7 million bpd, its highest since December, the EIA said.
- Houthi rebels launched two missiles at a corn cargo ship bound for Iran in the Red Sea on Monday, causing minor damage but no injuries, according to U.S. military officials. The missiles were fired from Houthi-controlled areas in Yemen toward the MV Star Iris, a Greek-owned, Marshall Islands-flagged vessel carrying corn from Brazil to Iran. While a spokesman for the Houthi military claimed the ship was American, maritime data confirmed it as Greek-owned. This incident, the first of

its kind targeting an Iranian-bound ship, saw the Houthis allegedly informing Iran beforehand.

Gulke Group 2024 Winter Palm Springs Conference Rancho Las Palmas in Rancho Mirage, CA on Feb. 21-23. conference will start at noon on Wednesday (Feb. 21) and conclude around noon on Friday (Feb. 23).

Yesterday's Trades: No new trades.

ADVICE: NO NEW ADVICE: The spec table is still short except for wheat and buy stops have come into range as volatility slowed somewhat. It is tempting to neutralize our positions (take profits again) but the risk seem high to do so as the odds of a positive black swan event seem risky today. There is a very wide range of guesses by various commercial firms for S America and Cordonnier seems to have gotten even more negative yields. Delta's are low at less than 35% so it would take a big move either way to affect short calls. But like the inflation report today, yesterday was the time to sell---so timing is important. So far the massive short covering expected by the negative funds has not materialized, yet.

COMMENTS: Economic CPI stats out this morning have inflation hotter than expected and quickly took 300 pts out of the NASDAQ and DJIA. The info and the rally in indices into 2024 seems on schedule and our thinking on inflation; along with Jamie Dimond and Goldman! Ideas of 6-8 rates cuts this year are now in the rear view mirror. Bonds collapsed and the US \$ exploded.

The Annual Ag Outlook Meeting is set for Thursday and Friday with Friday morning a look at their revised S/D for US. While global numbers are not necessarily addressed, inference may be revealed in the presentation by the USDA Economist. The general trader outlook is negative.

RESULTS HAVE MANY INHERENT LIMITATIONS, SOME OF WHICH ARE DESCRIBED BELOW. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. IN FACT, THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY ANY PARTICULAR TRADING PROGRAM.

ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THAT THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ALSO ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE NUMEROUS OTHER FACTORS RELATED TO THES IN GENERAL OR TO THE IMPLEMENTATION OF ANY SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY ACCOUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS AND ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS.

THE GULKE GROUP HAS HAD LITTLE OR N\O EXPERIENCE IN TRADING ACTUAL ACCOUNTS FOR ITSELF OR FOR CUSTOMERS. BECAUSE THERE ARE NO ACTUAL TRADING RESULTS TO COMPARE TO THE HYPOTHETICAL PERFORMANCE RESULTS, CUSTOMERS SHOULD BE PARTICULARLY WARY OF PLACING UNDUE RELIANCE ON THESE HYPOTHETICAL PERFORMANCE RESULTS. This composite performance records are hypothetical and are used as a guide for position tracking purposes. Execution prices are an average execution price of the first ten trades recorded after advice has been posted and commonsense. In the event less than 10 trades are executed, prices will be determined by looking at fills, in relation to when the advice was given to clients, and a commonsense price will be determined. If no trades are executed, prices are determined by looking at a 1 min chart to determine the tracking price. The closing price on the previous day is used to determine the P/L listed in the Morning Comments and are net of average round turn commissions of \$33.00 for futures and \$36 for options and round turn fees of \$5.34 for grains and \$5.50 for livestock (these fees may change at any time by the CME). One of the limitations of a hypothetical composite performance records is that client decisions relating to the recipient's advice may or may not elect to act upon such advice and timing of execution by clients of advice may create a difference in the execution price represented in the matrix below. Therefore, composite performance records may differ which may materially affect trading results.
