June 6, 2024

Weather:

- Not much rain will fall from eastern Ukraine through Russia's Southern Region to western Kazakhstan during the next ten days
- North China Plain and east-central China will be dry for this first week of the outlook with some opportunity for rain in the second week
- Southern China will remain wet with some potential for local flooding while Xinjiang, China turns drier and warmer
- U.S. rainfall is favorably mixed over the next two weeks; though there is drier bias for the heart of the eastern Midwest through day ten
- U.S. temperatures will be cooler than usual in this first week of the outlook in the Midwest and Great Plains and then warming back to normal or slightly above normal in the following week
- India's monsoon will advance northward into central parts of the nation during the next two weeks, although the interior south is not likely to get an abundance of rain; central areas will be wettest in the second week of the outlook
- Western Australia will get timely rainfall for wheat, barley and canola planting

 South Australia, northwestern Victoria and southwestern New South Wales will be
 driest for a while
- South Africa will be dry for a while, but recent rain has been supportive of aggressive wheat, barley and canola planting
- Much of Argentina and southern Brazil will receive a restricted amount of rain in the next week; however, southern Argentina should get some beneficial planting and establishment moisture for its wheat and barley this weekend
- Southwestern portions of West Texas will be dry over the next ten days
 - Scattered showers and thunderstorms are possible in northern and eastern portions of West Texas and in the Texas Panhandle
- South Texas and the Texas Coastal Bend will be drier biased over the next ten days
- Canada's southwestern Prairies will experience net drying through the weekend and then may trend wetter especially in the second half of the month
- Ontario and Quebec will see a good mix of rain and sunshine over the next two weeks
- Mexico's drought will not change in the coming ten days, but rain may increase thereafter in the south
- Central America rainfall is expected to be frequent easing dryness and drought conditions; some flooding is possible
- Europe will continue wet from southwest to northeast across the continent including areas from northern Spain to Belarus and western Ukraine over the coming week
- Philippines rainfall will return soon and timely rain is expected in Indonesia, Malaysia and the mainland areas of SE Asia

News:

•

USDA reported private sale of 152,000 metric tons of corn for delivery to unknown destinations during the 2023/2024 marketing year.

• Japan's Ag Ministry on Thursday bought a total of 103,767 mt of Aussie, Canadian and US origin food grade Wheat at their regular tender today. The purchase included 22,460 mt of Aussie white, 49,707 mt of Canadian red spring, and 31,600 mt of US HRW wheat.

• Grain traders Thursday reported around 65,000 mt of South American origin feed Corn was bought by South Korean importer in a privately negotiated deal.

• Russia will boost financial support to farmers but is not expected to ban grains exports if a federal emergency is declared due to frosts last month that damaged crops, industry sources told Reuters. "We don't expect strict restrictions on exports, but a reduction in our supply to the world market is quite possible. We will be less flexible on prices, recognizing the limitations of our supply," said the head of Rusgain, an exporter group which regularly meets with the government to discuss their views on the state of the industry.

• A case of H5N1 virus was detected in a dairy herd in O'Brien Co., Iowa, according to the state's agriculture department. A case of African swine fever has been confirmed on a pig breeding farm in Greifswald in the eastern state of Mecklenburg-Vorpommern, the state's ag ministry said.

• Chinese media said the country's farm officials have estimated 57% of the winter wheat crop has been harvested, and weather forecasters say suitable harvest conditions will remain for the coming days.

• U.S. crude oil stockpiles rose unexpectedly last week, while gasoline and distillate inventories also increased as refining ramped up and demand fell despite the kick-off of the summer driving season, the Energy Information Administration said on Wednesday. Crude inventories rose by 1.2 million barrels to 455.9 million barrels in the week ended May 31, the EIA said, compared with analysts' expectations in a Reuters poll for a 2.3-million-barrel draw.

• The ethanol side of the EIA weekly report was mixed again but much less dramatic than the prior report. Ethanol production inched another +0.4% higher wk/wk. The resulting 1.072 mil bbl/day rate would yield 315 million ethanol gallons on the week, consuming 109 million bushels of feedstock. **Over a marketing year, that rate would utilize 5.65 billion bushels of corn, which is now back above the YTD grind average.** Blender demand retreated -3% post-holiday, as expected. Exports also retreated, falling to 123k bbl/day versus 212k last week. Despite lofty production and a drop in disappearance, ethanol stocks dropped -0.7% to 23.1 million bbl.

• Maritime labor unions in Argentina announced on Thursday they would cease all activities in ports for 48 hours. The United Maritime Workers Union in a post on Facebook said

that the Tugboat Owners Chamber has refused to negotiate an expired bargaining agreement, prompting the union to halt work.

• Senate Ag Committee Chair Debbie Stabenow (D-Mich.) expressed significant concerns regarding the House Ag Committee's farm bill, particularly its provisions related to commodity programs. During an online conversation with former Sen. Heidi Heitkamp (D-N.D.), Stabenow said the House bill would substantially increase payments for Southern producers, specifically those with cotton, rice and peanut base acreage. She cites analysis from the University of Illinois and Ohio State that the proposal would essentially put the farm bill back to a system in place before the 2014 where "you get a government payment whether it's a good time or a bad time." Increasing reference prices by 70% would mainly benefit "big farmers" in the South, she said, citing estimates indicating these payments would more than double under the proposed legislation. Stabenow's criticism reflects broader opposition to the bill's approach, which some argue favors wealthier farmers and specific commodities at the expense of other priorities, such as climate funding and food aid. The bill's contentious nature and the divided government make its path to becoming law uncertain, with significant negotiations and potential revisions likely needed to achieve bipartisan support. Stabenow said she is eveing the post-election, lame duck session of Congress as the best chance to get new farm legislation passed this year.

Technically Speaking: SOME INCIGHT TO MARKETS:

There are four red-letter events to consider as part of a learning process. (1) A daily price down-gap was made on January 2, 2024 to begin a new calendar year. Odds are there was a fundamental rationale for that, but it escapes me now; the price action did not. It was all downhill from there to point (4) to end February when those basis contract had a major decision whether to capitulate or fix futures. A low was subsequently posted as if the market was saying, "if you didn't sell today, odds are you'll hold inventory (old crop) and help new crop prices as well as we went into early March preparing for insurance and planting decisions.

November futures managed to rally half-way back of the losses from Jan 2; not untypical in price discovery. Prices retreated but NOT to the lows of Feb 28th. The subsequent rally during the end of April into mid-May tried to get back to the down gap of Jan 2 but failed. It should be noted that if prices can rally to a down gap, fill and close above it, it would represent a move that would basically state that the negative bias on Jan 2 (the gap) was no longer significant. That didn't happen.

Red flag (3) was another attempt to attack the gap but couldn't even take out mid-May prices. The key reversal down that day put the nail in the coffin. The rest is history as we are on attack for the Feb 28th low, which may indicate that the market believes producers are still holding 2023 inventory just as S America comes on board as a major competitor whatever the crop size.

A final point, yet to be determined, is the matter of carryover. Whether it is 300 or 350 or 400 mil-bu for soybean, or 2.2, or 1.8 billion bushels for corn, that carryover or lack thereof is the

LAST bit of inventory that will be needed, or NOT, to end a marketing year. Furthermore, if we PP acres or some acres get flooded out in IA or MN, those bushels produced won't be needed until we exhaust all other supplies in N and/or S America. It is a 'futures' event!

A by-product of all these words regarding analysis over the last 18 months of continued downtrending markets as often discussed with little interest in risk management compared to pre-covid and the ability to lock in high coverage insurance. It is as if there is complacency in Ag beyond what I have seen in years. Or, have we resolved to our price-plight and hope something will happen—maybe weather in an adjoining state or country to bail us out of negative cash flow. That concerns me; worse yet it frightens me.

If I had to "hope" for a change it will have to come from weather. In 1988 things looked very good going into June 21 and then it turned hot for days over 100 degrees and hot past July 4th. This is not a good time to become complacent. The sudden rebound in markets today was not unexpected but timing is always and issue.

Market Fundamentals:

Source: USDA (FAS) - Gulke Group

Wheat: Net sales reductions of 229,000 metric tons (MT) for 2023/2024 reductions by primarily Mexico (72,200 MT), unknown destinations (64,600 MT), the Philippines (54,400 MT), South Korea (33,100 MT), and Taiwan (25,800 MT). Net sales of 616,900 MT for 2024/2025 primarily for unknown destinations (136,600 MT), Taiwan (123,900 MT), the Philippines (115,000 MT), Mexico (101,000 MT), and China (60,500 MT). Corn: Net sales of 1,180,900 MT for 2023/2024 were up 46 percent from the previous week and 41 percent from the prior 4-week average. Increases primarily for Mexico (380,200 MT, including 50,000 MT switched from unknown destinations and decreases of 21,400 MT), Japan (307,300 MT), Spain (271,800 MT), China (136,200 MT). Soybeans: Net sales of 189,600 MT for 2023/2024 were down 43 percent from the previous week and 42 percent from the prior 4-week average. Increases primarily for the Netherlands (56,700 MT, including 62,000 MT switched from unknown destinations and decreases of 5,300 MT), Egypt (54,400 MT, including decreases of 4,600 MT), Mexico (51,000 MT). Soybean Cake and Meal: Net sales of 250,200 MT for 2023/2024 were down 6 percent from the previous week, but up 9 percent from the prior 4-week average. Increases primarily for Colombia (66,200 MT, including 10,000 MT switched from unknown destinations, 1,300 MT switched from Venezuela, and decreases of 4,400 MT), the Philippines (47,300 MT), Panama (34,100 MT), the Dominican Republic (28,300 MT), and Honduras (28,000 MT).

Yesterday's Trades: no new trades.

ADVICE: Exited short calls in early advice as follows:

- Exited all short SX \$12.00 and above short CZ calls
- Exited all short CZ \$4.80 and above call options ---

Futures exploded further post 9:00 am -we'll deal with those later however CZ has posted KR higher today with others posting strong reversals---Wheat must be monitored as it only retraced 38% of its full near \$2 rally.

COMMENTS: time to go to the bank

We've have been fortunate to be on the very shot side of the latest collapse to where profit taking seems rationale especially in short call whose deltas were in the 30 range or less. Timing is everything as we've seen with quick down and up days so maybe all new crop short calls will expire worthless but US corn getting more business and beans are subject. June 30 in a few weeks and USDA still hasn't reconciled what we believe to be overestimating corn stocks.

Futures profits are also on agenda but the explosion in prices makes it a little more difficult. It is important to note that we deliberately held short calls in CZ and SX. Charts update above again but recent charts showed the virtual collapse in many markets.

LIVESTOCK: higher corn affecting FC in a market already short technically.

ECONOMY: Canada cut interest rates yesterday and the ECB today--- generally speaking rates aren't cut unless an economy is seen turning negative---personal bias is cutting rates is concerning!

Weather: Mixed but generally cooler than warming---last half of June was the time when forecasters said they'd see much warming trend----think some are abandoning that with hotter and maybe wetter--- 5 day forecast more reliable than 10-15 even yet.

Export Sales—good today---see details above

RESULTS HAVE MANY INHERENT LIMITATIONS, SOME OF WHICH RE DESCRIBED BELOW. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. IN FACT, THERE ARE FRE-OUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY ANY PARTICULAR TRADING PROGRAM. ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THAT THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ALSO ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE NUMEROUS OTHER FACTORS RELATED TO THES IN GENERAL OR TO THE IMPLEMENTATION OF ANY SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY AC-COUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS AND ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS. THE GULKE GROUP HAS HAD LITTLE OR N\O EXPERIENCE IN TRADING ACTUAL ACCOUNTS FOR ITSELF OR FOR CUSTOMERS. BECAUSE THERE ARE NO ACTUAL TRADING RESULTS TO COMPARE TO THE HYPOTHETICAL PERFORMANCE RESULTS, CUSTOMERS SHOULD BE PARTICULARLY WARY OF PLACING UNDUE RELIANCE ON THESE HYPOTHETICAL PERFORMANCE RESULTS. This composite performance records are hypothetical and are used as a guide for position tracking purposes. Execution prices are an average execution price of the first ten trades recorded after advice has been posted and commonsense. In the event less than 10 trades are executed, prices will be determined by looking at fills, in relation to when the advice was given to clients, and a commonsense price will be determined. If no trades are executed, prices are determined by looking at a 1 min chart to determine the tracking price. The closing price on the previous day is used to determine the P/L listed in the Morning Comments and are net of average round turn commissions of \$33.00 for futures and \$36 for options and round turn fees of \$5.34 for grains and \$5.50 for livestock (these fees may change at any time by the CME). One of the limitations of a hypothetical composite performance records is that client decisions relating to the recipient's advice may or may not elect to act upon such advice and timing of execution by clients of advice may create a difference in the execution price represented in the matrix below. Therefore, composite performance records may differ which may materially affect trading results.
