

June 18, 2024

Weather:

WORLD WEATHER HIGHLIGHTS FOR JUNE 18, 2024

- Improving eastern Midwest, Delta and southeastern U.S. rain potentials are seen for next week in today's forecasts
- Rain will continue most abundant in the northern U.S. Plains and upper Midwest over the coming week leading to local areas of flooding
- Timely rain will also impact the central Plains and southwestern Corn and Soybean Belt in this coming week with drier weather next week
- Tropical depression evolving in the Gulf of Campeche will become a tropical storm before moving into interior northeastern and east-central Mexico Wednesday night and early Thursday
 - Heavy rain from the lower Texas coast into northeastern Mexico is likely resulting in some flooding and a little crop damage
- A second tropical weather system may evolve in the western Gulf of Mexico this weekend and it, too, may reach South Texas, according to the European forecast model run
- U.S. weather will change next week with the warmest and driest weather shifting to the Plains and Rocky Mountain region while cooler air impacts the eastern part of North America with some shower and thunderstorm activity to accompany the temperature change
- No expansion or intensification of dryness or heat in Russia or Ukraine is expected in the coming ten days
- China's driest areas may get some rain this weekend into next week, although the European model insists that the resulting rainfall will not be very good
- India's monsoon will perform favorably over the next two weeks with rain likely in central and interior southern parts of the nation
- Rain will return to western and northern Europe later this week and into next week slowing harvest progress and returning concern over winter crop quality
- Frost and freezes are occurring this morning in portions of Canada's western Prairies today and more of the same was expected through Thursday morning, although Wednesday will be coldest
 - Alberta will be coldest with lows today in the upper 20s and 30s Fahrenheit (-2 to +4C)
 - Northwestern Saskatchewan lows today will be in the 30s Fahrenheit (-1 to +3C)
 - Both Alberta and Saskatchewan will see lows Wednesday in the upper 20s and 30s Fahrenheit (-2 to +3C)
 - Some crop damage is expected, though it will be hard to assess and it should not be widespread

- The cold will shift to northern Manitoba Thursday with frost possible along with a few patches of it in Saskatchewan as well
 - Thursday will not be nearly as cool as today or Wednesday
- Waves of rain will return to Canada's Prairies after the cold this week abates
- Heavy rain is returning to Rio Grande do Sul and Santa Catarina, Brazil and southern Paraguay in this coming week resulting in some new flooding
- Argentina will experience a good mix of rain and sunshine, although greater rain may eventually be needed to support the best wheat and barley establishment
- Safrinha crops in Brazil are unlikely to get much rain, although Paraguay and Parana may get some moisture from this week's storm weather pattern in southern Brazil
- Australia will continue to get some periodic showers to benefit its winter crop planting and establishment in the south; Queensland and parts of South Australia will still need significant rain

News:

- Grain traders reported around 60,000 mt of optional origin Soymeal was bought by Feed Leaders Committee.
- NOPA May 2024 US Soybean Crush: 183.625 million bushels; expected 178.35 mln bu.; prior month 166.034 mln bu; May 2024 US Soyoil Stocks: 1.724 billion lbs; expected 1.775 bln lbs; prior month 1.755 billion lbs
- Brazil's ABIOVE lowered its 2024 Brazil soybean production forecast to 152.5 mln mt from 153.9 mln mt previously. They also lowered their outlook for 2024 ending stockpiles to 4.105 mln mt from the previous 5.305 mln mt estimate.
- Ukraine grain trade union estimated grain and oilseed exports over the first half of June at 1.97 mln mt, that's off from the 2.69 mln mt shipped abroad in the first half of May. Corn exports fell to 1.30 mln mt from 1.71 mln mt, while wheat exports fell to 514,000 mt from the previous period's 762,000 mt.
- A bipartisan group of 18 senators is urging EPA to set higher biodiesel and advanced biofuel mandates for 2026 under the Renewable Fuel Standard. Despite record-high levels for 2023-2025, new evidence suggests the need for significantly higher volumes to match increased production capacity. The senators, led by Amy Klobuchar (D-Minn.) and Chuck Grassley (R-Iowa), cited Energy Information Administration data indicating current levels are "significantly below production trends." They highlighted a 66% drop in Renewable Identification Number values since last year's levels were set, leading to facility closures, job losses and disrupted local economies. The lawmakers warned this negative signal threatens investments in renewable fuel production, including sustainable aviation fuel. EPA is expected to finalize the 2026 RFS levels later this year.
- The Iowa Department of Agriculture reported another outbreak of H5N1 virus in a Sioux County dairy herd of 10,000 cows, marking the seventh outbreak in Iowa this month. This is the fifth outbreak in Sioux County, with other reported cases in O'Brien and Plymouth counties.

Chinese Customs Data:

- May 2024 Corn imports at 1.05 mln mt off -36.8% from the year ago month. Jan-May imports totaled 10.13 mln mt that is off -0.5% from the year earlier period.
- May 2024 Wheat imports at 1.86 mln mt up +61.0% from the year ago month. Jan-May imports totaled 8.09 mln mt that is up +12.6% from the year earlier period.
- May 2024 Barley imports at 1.61 mln mt up +26.4% from the year ago month. Jan-May imports totaled 7.66 mln mt that is up +93.0% from the year earlier period.
- May 2024 Sorghum imports at 0.670 mln mt up +2.4% from the year ago month. Jan-May imports totaled 3.65 mln mt that is up +122.0% from the year earlier period.
- May 2024 Pork imports at 80,000 mt off 41.0% from the year ago month. Jan-May imports totaled 430,000 mt that is off -47.1% from the year earlier period.

CROP MARKETING YEARS BEGIN JUNE 1 FOR WHEAT, RYE, OATS, BARLEY AND FLAXSEED; SEPTEMBER 1 FOR CORN, SORGHUM, SOYBEANS AND SUNFLOWER SEEDS. INCLUDES WATERWAY SHIPMENTS TO CANADA.

Technically Speaking:

Market Fundamentals:

Yesterday's Trades: Canola – for 2023 Bot 60% July Canola at 604.6(\$299.65 Profit/contract).

ADVICE: WHEAT: Take the profits today best can on all WN Chicago for all classes. We'll monitor Dec wheat going forward for Chicago and Sept for Mpls and KC.

COMMENTS:

Some talk of warmer/drier weather in our future and getting some attention in the media. Personal bias is more positive corn based on time/price/weather at least for now with last week's lows the line in the sand.

Yesterday's Export Inspections were better than expected for Corn, Soybeans and Wheat. It is still a little too early to tell if the USDA can increase corn exports for the current marketing year in any of their subsequent S&D reports but unless something changes soon there is likely the justification to lower them in soybeans.

The crop ratings are a take 'em or leave 'em type of data. On the one hand this week the G/E category in Illinois went down 9% in corn and 8% in soybeans while overall the G/E dropped 2% in both vs last week. **Call or text me at 707-365-0601 and let me know if you see this kind of drop in IL.** I am certainly not seeing it on our farm.

Seems like the US is still in line for corn exports, but the CNF (source Phillips Analytics) above shows the difficulty especially for soybeans sourced out of the US. Weather effect on crop ratings showing up a little in yesterday 's report shown above. Markets closed tomorrow but trade tomorrow night so would expect the turnaround Tuesday scenario gains some traction. We have lightened the hedges recently and we'll wait one more day—until Wed to look at remaining CZ2024 hedges. The spec table is now largely short grains but with CZ now long. Beans hit a new short trigger yesterday as did meal and wheat. Mpls wheat at mid-April lows again.

RESULTS HAVE MANY INHERENT LIMITATIONS, SOME OF WHICH RE DESCRIBED BELOW. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. IN FACT, THERE ARE FRE-QUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY ANY PARTICULAR TRADING PROGRAM. ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THAT THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ALSO ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE NUMEROUS OTHER FACTORS RELATED TO THES IN GENERAL OR TO THE IMPLEMENTATION OF ANY SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY AC-COUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS AND ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS. THE GULKE GROUP HAS HAD LITTLE OR N\O EXPERIENCE IN TRADING ACTUAL ACCOUNTS FOR ITSELF OR FOR CUSTOMERS. BECAUSE THERE ARE NO ACTUAL TRADING RESULTS TO COMPARE TO THE HYPOTHETICAL PERFORMANCE RESULTS, CUSTOMERS SHOULD BE PARTICULARLY WARY OF PLACING UNDUE RELIANCE ON THESE HYPOTHETICAL PERFORMANCE RESULTS. This composite performance records are hypothetical and are used as a guide for position tracking purposes. Execution prices are an average execution price of the first ten trades recorded after advice has been posted and commonsense. In the event less than 10 trades are executed, prices will be determined by looking at fills, in relation to when the advice was given to clients, and a commonsense price will be determined. If no trades are executed, prices are determined by looking at a 1 min chart to determine the tracking price. The closing price on the previous day is used to determine the P/L listed in the Morning Comments and are net of average round turn commissions of \$33.00 for futures and \$36 for options and round turn fees of \$5.34 for grains and \$5.50 for livestock (these fees may change at any time by the CME). One of the limitations of a hypothetical composite performance records is that client decisions relating to the recipient's advice may or may not elect to act upon such advice and timing of execution by clients of advice may create a difference in the execution price represented in the matrix below. Therefore, composite performance records may differ which may materially affect trading results.
