

Weather:

WORLD WEATHER HIGHLIGHTS FOR JUNE 20, 2024

- U.S. model outlook for the last week of June has suggested a wetter bias today, but much caution is advised on that outlook
 - Some relief is expected, but the amount of rain that results in the lower Midwest, Delta and interior southeastern states may still be restricted
 - Cooler temperatures and "some" rain will provide relief from this week's hot and dry conditions, but more rain will be required than what is most likely to occur in these areas
- Upper Midwest and northeastern U.S. Plains will continue abundantly wet into the weekend with some follow up rain next week keeping those areas plenty moist, if not a little too wet
- Recent rain has brought disruptive rain to the southwestern hard red winter wheat areas

- Flooding is expected to expand in Mexico today, take a little break Friday into Saturday and then get more heavy rain late in the weekend and early next week as a new tropical disturbance begins to spread rain inland
- Monsoonal moisture will begin flowing northward through Mexico next week and may reach the southwestern U.S. Friday
- Drier weather is expected in Ukraine, southeastern Europe and southern parts of Russia's Southern Region
- Excessive heat recently in western Kazakhstan and neighboring areas will break down in the coming week to ten days with some scattered showers and thunderstorms along with cooling expected
- India's monsoon will see improved rainfall along the middle and lower west coast and from Madhya Pradesh and eastern Maharashtra into Odisha and Telangana
- China's North China Plain will continue drier than usual over the next ten days while waves of heavy rain and flooding impact the Yangtze River Basin
- Portions of northeastern China will also experience frequent showers and thunderstorms with the ground becoming abundantly to excessively wet
- Australia weather will remain favorable for winter crop planting and establishment.

News:

- Grain trade sources reported 60,000 mt of South American origin Soymeal was bought by Korea Feed Association in a privately negotiated deal.
- Japan's Ag Ministry bought a total of 84,667 mt of feed grade wheat at yesterday's regular tender. The total included 22,460 mt of Aussie white wheat, 32,590 mt of Canadian red spring, 21,967 mt of US white, and 7,650 mt of US DNS wheat.
- Trade sources reported at least 51,000 mt of optional origin feed grade Wheat was bought by Thai importers in a tender that closed yesterday.
- Chinese customs data pegged May soybean imports from the United States at 1.27 mln mt that compares with the 494,103 mt from the year ago month. Imports of Brazil soybeans in May totaled 8.8 mln mt. China imported a total of 10.22 mln mt of soybean during May 2024, that's off -19% from May 2023.
- Brazil's Foreign Trade Chamber at the ministry of economy voted to uphold an 18% tariff on ethanol imports from the United States. This decision has drawn criticism from U.S. industry groups, who argue the tariff unfairly disadvantages American ethanol producers in the Brazilian market. The U.S. has previously threatened to impose retaliatory tariffs on Brazilian goods if the ethanol tariff remained in place. Brazil has defended the tariff as a necessary measure to safeguard its domestic ethanol industry and ensure a stable supply of biofuels for its transportation sector.
- Chinese state media reported the country's sow herd at the end of May was 39.96 million head, that's up slightly from the end of April figure at 39.86 million head.
- IKAR analysts increased their 2024 Russian wheat crop harvest forecast to 82.0 mln mt, up +0.5 mln mt from the previous estimate.

- German farmer co-op forecast this year's rapeseed crop at 3.89 mln mt, that's -8.0% lower than last year's crop.
- China may impose provisional anti-dumping measures on pork imports from the European Union as part of a year-long probe that began on June 17, its commerce ministry said. "If, after a preliminary investigation, it is determined that dumping has been established and has caused injury to domestic industry, provisional anti-dumping measures may be taken," a commerce ministry spokesperson said, without giving specific details.

Technically Speaking:

Yesterday's Trades: Wheat– All Classes, For 2022,2023 and 2024 Bot 10% July Wheat at 585 (\$987.5 Profit/contract).

ADVICE: No New Advice.

COMMENTS:

Starting the day out negative across the board again. Soybeans and wheat continue to fall. December wheat is searching for support, and we may need to enter back into that market. Soybeans could be dealing with the thought of more acres.

In the soybean complex soybean meal is one to keep an eye on as Argentina should start ramping up their exports. We do not want to see any cancellations popping up in the next few weeks.

The decision process in corn seems to have narrowed just as our time to get needed information is narrowing. Corn has a range now of about 25 cents—not much here. The 50-day moving average sits at about \$4.75, with the bottom end at about \$4.50. If the market is thinking there are going to be more acres on June 30 another leg lower could be in the offing.

Brazil has elected to maintain their ethanol tariff on US ethanol forcing domestic demand to stay strong along with the recent exports we have had to other countries.

RESULTS HAVE MANY INHERENT LIMITATIONS, SOME OF WHICH RE DESCRIBED BELOW. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. IN FACT, THERE ARE FRE-QUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY ANY PARTICULAR TRADING PROGRAM. ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THAT THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ALSO ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE NUMEROUS OTHER FACTORS RELATED TO THES IN GENERAL OR TO THE IMPLEMENTATION OF ANY SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY AC-COUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS AND ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS. THE GULKE GROUP HAS HAD LITTLE OR N\O EXPERIENCE IN TRADING ACTUAL ACCOUNTS FOR ITSELF OR FOR CUSTOMERS. BECAUSE THERE ARE NO ACTUAL TRADING RESULTS TO COMPARE TO THE HYPOTHETICAL PERFORMANCE RESULTS, CUSTOMERS SHOULD BE PARTICULARLY WARY OF PLACING UNDUE RELIANCE ON THESE HYPOTHETICAL PERFORMANCE RESULTS. This composite performance records are hypothetical and are used as a guide for position tracking purposes. Execution prices are an average execution price of the first ten trades recorded after advice has been posted and commonsense. In the event less than 10 trades are executed, prices will be determined by looking at fills, in relation to when the advice was given to clients, and a commonsense price will be determined. If no trades are executed, prices are determined by looking at a 1 min chart to determine the tracking price. The closing price on the previous day is used to determine the P/L listed in the Morning Comments and are net of average round turn commissions of \$33.00 for futures and \$36 for options and round turn fees of \$5.34 for grains and \$5.50 for livestock (these fees may change at any time by the CME). One of the limitations of a hypothetical composite performance records is that client decisions relating to the recipient's advice may or may not elect to act upon such advice and timing of execution by clients of advice may create a difference in the execution price represented in the matrix below. Therefore, composite performance records may differ which may materially affect trading results.
