

July 1, 2024

Weather:

- A good mix of rain and sunshine is expected in U.S. Midwestern crop areas during the next ten days
 - o Some heavy rain is expected in the western Corn Belt
- Timely rain will fall in the Delta and southeastern states
- Temperatures will be milder across the central and eastern states for the coming week and a little closer to normal next week
 - The combination of periodic rain and seasonable temperatures will develop crops aggressively
- Hurricane Beryl is moving across the southern Windward Islands in the Atlantic
 Ocean today while producing 120 mph sustained wind speeds
 - The storm was moving with a forward speed of 20 mph which will help to reduce the duration of the most adverse weather conditions, but widespread damage is expected
 - Hurricane force wind is occurring out 35 miles from the center of the storm keeping it rather small
 - The storm center is now expected to pass immediately south of Jamaica Wednesday and reach the Yucatan Peninsula Friday
 - Weakening is expected, but the storm will come inland as a hurricane
 - Beryl may move across the Gulf of Campeche as a tropical storm this weekend with landfall ultimately into eastern Mexico Sunday or next Monday
- Tropical Depression Chris will dissipate over east-central Mexico today after moving inland overnight
- Drying has resumed in Russia's Southern Region, central and eastern Ukraine and areas north into Russia's Central Region and middle Volga River Basin for the next ten days
 - o Temperatures will be warmer than usual inducing quick drying and crop stress
- Europe was quite warm in the central and east during the weekend and will slowly cool from west to east this week
- Europe will see a mostly good mix of rain and sunshine over the next ten days
- China's drought stricken North China Plain and lower Yellow River Basin will see rain in this coming week to ten days offering relief to dryness that has been quite persistent recently

- China's Yangtze River Basin will experience drier weather later this week into next week
- Australia will continue to see a good mix of rain and sunshine for establishing winter crops
- Southern Brazil will see additional rain in the coming ten days maintaining wet field conditions
 - o Some of the rain will also impact Paraguay, Uruguay and northeastern Argentina
- The bulk of Argentina and Brazil will be dry outside of the areas noted above
- India's monsoon will bring rain to many areas during the next two weeks with the central and northeast wettest

News:

- The Saudi state-run grain buyer reported they bought around 235,000 mt of hard wheat.
- SovEcon analysts lowered their 2024 Russia wheat export forecast to 46.1 mln mt, from the previous 47.8 mln mt forecast. Last year's wheat exports were 52.2 mln mt.
- Chinese buyers have booked around 12 MMT to 13 MMT of soybeans for July arrival, two Singapore-based traders and two analysts in China told Reuters, with the bulk of the purchases from Brazil. China's all-time high for soybean imports was 12.02 MMT in May 2023.
- India's state weather bureau Monday noted June's rainfall was -11% below normal levels across all regions, Central India received 14% less, northwestern India received 33% less, and northeastern India received 13% less than normal. Southern India received 14% above average monsoon rains. However, the weather bureau also noted monsoon rains will cover the entire country ahead of schedule.
- Argentina's CIARA-CEC, the soy crush and export business chamber, noted June 2024 Argentina soybean sales from farms to commercial traders were around 3.8 mmt, off -45% from May's pace. Traders say a weakened Argentina peso between the official exchange rate and black-market rates, has an effect on exporters hoarding due to losing out using the official exchange rate.
- The European Commission changed the date for pre-disclosure of potential provisional duties on imports of Chinese biodiesel to July 19 from June 28, according to an update last Friday on the commission's trade defense website. The duties in the anti-dumping case would now be imposed by Aug. 16, from a previous deadline of July 29, the update also showed.

CROP MARKETING YEARS BEGIN JUNE 1 FOR WHEAT, RYE, OATS, BARLEY AND FLAXSEED; SEPTEMBER 1 FOR CORN, SORGHUM, SOYBEANS AND SUNFLOWER SEEDS. INCLUDES WATERWAY SHIPMENTS TO CANADA.

Yesterday's Trades: no new trades.

ADVICE: No News Advice

COMMENTS:

We have seen some volatility so far going into the first trading day after the report, first notice day and end of the month. The lows we make and how we close today could have some important implications moving forward.

Shorter-term Midwest weather looks to call for above normal precipitation with normal to below normal temperatures, but it still looks like heat is on tap looking out further. The market feels like it is good growing conditions moving forward.

Crop Insurance prices are still a long way away with the 95% ECO coverage in corn and soybeans the only one in play currently. Corn at 80% is still over 40 cents away with 80% soybeans \$1.80 away.

China is rumored to have booked 11 to 12 mmt (out of Brazil) of soybeans for the month of July. If this is confirmed and we do not see cancellations it should still be beneficial as some

movement is needed. Brazil still is cheaper than US through Oct/Nov/Dec so going to be hard to see any business coming our way.

USDA's data shown above is for your viewing unpleasure. This is the data we must deal with. New S&D numbers will come out next week incorporating this updated data so will not look supportive.

Grain Inspections data out this morning did not provide any good news for the grains.

RESULTS HAVE MANY INHERENT LIMITATIONS, SOME OF WHICH RE DESCRIBED BELOW. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. IN FACT, THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY ANY PARTICULAR TRADING PROGRAM. ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THAT THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ALSO ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE NUMEROUS OTHER FACTORS RELATED TO THES IN GENERAL OR TO THE IMPLEMENTATION OF ANY SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY ACCOUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS AND ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS. THE GULKE GROUP HAS HAD LITTLE OR N\O EXPERIENCE IN TRADING ACTUAL ACCOUNTS FOR ITSELF OR FOR CUSTOMERS. BECAUSE THERE ARE NO ACTUAL TRADING RESULTS TO COMPARE TO THE HYPOTHETICAL PERFORMANCE RESULTS, CUSTOMERS SHOULD BE PARTICULARLY WARY OF PLACING UNDUE RELIANCE ON THESE HYPOTHETICAL PERFORMANCE RESULTS. This composite performance records are hypothetical and are used as a guide for position tracking purposes. Execution prices are an average execution price of the first ten trades recorded after advice has been posted and commonsense. In the event less than 10 trades are executed, prices will be determined by looking at fills, in relation to when the advice was given to clients, and a commonsense

price will be determined. If no trades are executed, prices are determined by looking at a 1 min chart to determine the tracking price. The closing price on the previous day is used to determine the P/L listed in the Morning Comments and are net of average round turn commissions of \$33.00 for futures and \$36 for options and round turn fees of \$5.34 for grains and \$5.50 for livestock (these fees may change at any time by the CME). One of the limitations of a hypothetical composite performance records is that client decisions relating to the recipient's advice may or may not elect to act upon such advice and timing of execution by clients of advice may create a difference in the execution price represented in the matrix below. Therefore, composite performance records may differ which may materially affect trading results.
