

August 2, 2024

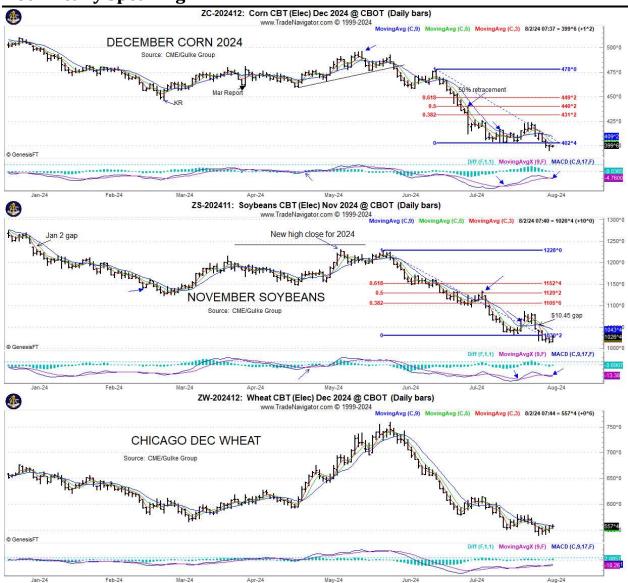

Weather:

- Dry areas from eastern Ukraine to Russia's Southern Region are advertised to get some rain next week before drier and warmer weather resumes in the following weekend and prevails for another week thereafter
- Canada's Prairies are expected to get some timely rainfall next week as cooler air spreads across the region
 - Partial relief to persistent dryness is expected, but the moisture may come too late for some wheat and canola that has already lost yield potential
 - Southwestern areas may be wettest
- The tropical wave moving through the Greater Antilles is now expected to move into the eastern Gulf of Mexico this weekend into next week and has a 50% potential for evolving into a tropical cyclone in the next two days and an 80% chance by early next week, according to the U.S. National Hurricane Center
 - Landfall may occur in northern Florida between Tampa and Tallahassee and will then move to the Carolina coast during mid-week
- Cold air coming into Canada's eastern Prairies and Ontario late next week may push enough coolness into the U.S. Midwest to induce rain and thunderstorms in the drier areas of the southwestern Corn and Soybean Belt bringing relief to dryness, but no rain will reach the Delta
 - Nighttime temperatures may fall into the 40s Fahrenheit in the eastern Prairies and upper Midwest briefly late next week
- West Texas rainfall is not likely to be very great in the next ten days
- Argentina rainfall today into Saturday and again early to mid-week next week may be sufficient to induce some improved soil moisture and winter crop establishment
- No changes were noted to Brazil, Australia or China weather overnight
 - China is still expecting more rain in the wetter areas of the northeast during the next ten days
- Europe weather will be favorably mixed for fieldwork and crop development over the next two weeks with warming likely in the east next week
- Frequent rain in Russia will maintain some concern over crop conditions especially in the New Lands from the Ural Mountains to Siberia where it may be wet and cool for a while

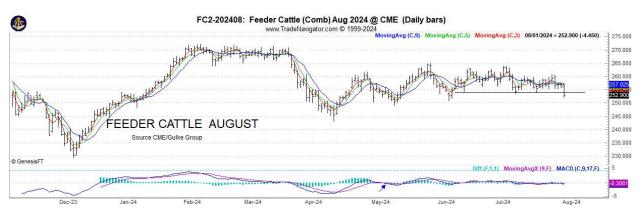

- USDA reported private sale of 202,000 metric tons of soybeans for delivery to China during the 2024/2025 marketing year.
- Buenos Aires Grain Exchange estimated Argentina corn harvest at 92% complete and entering its final leg. They kept their harvest forecast steady at 46.5 mln mt, that's 9.5 mln mt more than last year's crop.
- StoneX estimated U.S. corn production at 15.207 billion bu. on a yield of 182.3 bu. per acre. The firm estimated the soybean crop at 4.483 billion bu. on a 52.6 bu. per acre yield. In July, USDA projected corn production and yield at 15.1 billion bu. on a trendline yield of 181 bu. per acre. USDA's July soybean projections were 4.425 billion bu. for production and 52 bu. per acre for yield. The StoneX estimates are based on a survey of its customer and assume USDA's harvested acreage.
- France's wheat harvest reached 67% as of July 29, according to the country's ag ministry, well behind the five-year average of 84%. Heavy rains continue to hamper harvest progress and hurt yields and crop quality.
- Weekly France AgriMer crop report placed Corn conditions at 79% good to excellent, down from 82% in the prior week.
- Buenos Aires Grain Exchange noted Argentina wheat planting has been completed, and nearly 40% of the crop is in the tillering-stalking phase. They also said estimated the wheat crop in Argentina at 84.3% good to normal conditions.
- China halted imports of meat and meat products from the Swift Beef Company plant in Grand Island, Nebraska, and Lineage Logistics cold storage facilities in Grand Island, Nebraska, and Windsor, Colorado. This marks the second Swift Beef facility banned by China, following a May 27 suspension of imports from the Swift plant in Greeley, Colorado. No reason was given for the suspension. In the case of the Greeley, Colorado, plant, U.S. officials reportedly found traces of ractopamine in meat destined for export to China, leading to the suspension.
- Traders from India estimated July edible oil imports at 1.85 mln mt, that was up +21% from the previous month and said to be the second highest on record. The surging imports jumped on a 39% increase to palm oil imports at 1.09 mln mt, and 43% jump on soyoil imports at 394,000 mt. However, sunflower oil imports were off 22% on the month at 364,000 mt.
- A meeting of top OPEC+ ministers has kept oil output policy unchanged including a plan to start unwinding one layer of output cuts from October, and repeated that the hike could be paused or reversed if needed.
- China's slumping consumption of diesel, as use of LNG-powered trucks grows, is
 weighing on domestic fuel demand, with forecasters warning of further risks
 from a sluggish economy hobbled by a prolonged crisis in the property sector.
 While the world's second largest economy was long the growth engine for global
 oil demand, its peaking appetite for transport fuel, as an energy transition gathers pace in a sputtering economy, is now dampening world markets.

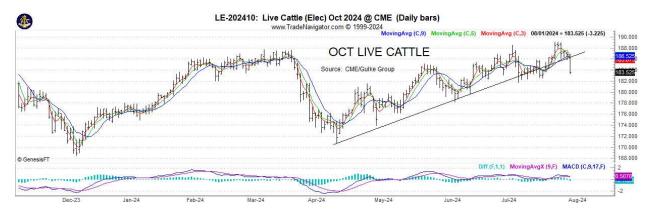

• The Union Pacific Railroad recently announced tariff rate increases for ethanol shipments that will take effect on October 1. UP plans to raise tariff rates by \$400 per car for unit trains and \$400-475 for manifest shipments. Before the tariff rate increases take effect on October 1, the current tariff rate is \$6,070 per tank car for ethanol unit trains (minimum of 113 cars) from Columbus, NE, to Houston-Galveston export terminals.

Yesterday's Trades: No new trades

ADVICE: Tough to find anything positive but prices near bankruptcy levels for both US and S America.

CORN: sell 10% 2023 and 2024 at \$4.02 $\frac{1}{2}$ Dec futures. Cancel if not filled by 12:30 noon an replace with a sell stop \$3.98 $\frac{1}{2}$.

SOYBEANS: Critical \$10.30 SX must be exceeded to get a chance at a \$10.45 trade. Sell 10% 2024 crop at \$\$10.29 and place sell stop for 10% SX at \$10.16—cancel 10.29 if 10.16 is filled first. China finally buying for 2024/25

WHEAT: Place Sell stop for 10% of 2023 and 2024 in WZ Chicago at \$5.45 for all classes.

CANOLA: In spite of ideas of dryness in Canada, Canola has lost all that weather premium.

COMMENTS: Volatility affecting economic stuff now---remember if owners of funds want to take profits, they will get the close today---buyers aren't likely to buy big dips with economy now uncertain. Spec table leaning short. Stone X along with other increasing yields ---something we already know---so market direction from here hangs in the balance. We are aware of what it will look like in 2025 and spent a lot of time yesterday discussing.

GRAINS:

- CORN needs to close above \$4.02 ½ today
- SOYBEANS need to sustain close over \$10.30—China finally buying for 2024/25 as basis in Brazil helping US.
- MEATS. LC and FC reflecting consumer pushback now or in future. Hogs benefit but tenuous.

OUTSIDE MARKETS

- Stock markets collapsed yesterday as economic indicators finally turned to support our bias and continued overnight affecting global markets as well. Jobs report today at 7:30 am continued to support our bias that an economic setback was already in pr ogress -tough to turn around a big ship that has already sailed. DJIA, NASDAQ down another 500 on 7:30 news, S&P down over 100!!!!
 - Employment hiring slowing /dropping -slowest gains in years---more layoffs announced today.
 - Interest rates falling with now a 70% chance of ½ % drop in September. 10yr rates acting differently--- Stagflation an issue????
 - Market gurus will now wonder if the Fed can drop interest rates fast enough to ward off a recession.
 - US and global demand now in question
 - We'll still argue FED and Analysts unaware of what is going on in middle America.
- Crude oil and energies down with more war conflicts
 - Israel likely hits refineries if Iran retaliates can't hold crude today.
 - Energy still big influence on inflation
- US Dollar Index falling like a rock today—weekly reversal in place –that is a positive psychologically—if grains can't get some support from that even????

RESULTS HAVE MANY INHERENT LIMITATIONS, SOME OF WHICH RE DESCRIBED BELOW. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. IN FACT, THERE ARE FRE-OUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY ANY PARTICULAR TRADING PROGRAM. ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THAT THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ALSO ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE NUMEROUS OTHER FACTORS RELATED TO THES IN GENERAL OR TO THE IMPLEMENTATION OF ANY SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY AC-COUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS AND ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS. THE GULKE GROUP HAS HAD LITTLE OR N\O EXPERIENCE IN TRADING ACTUAL ACCOUNTS FOR ITSELF OR FOR CUSTOMERS. BECAUSE THERE ARE NO ACTUAL TRADING RESULTS TO COMPARE TO THE HYPOTHETICAL PERFORMANCE RESULTS, CUSTOMERS SHOULD BE PARTICULARLY WARY OF PLACING UNDUE RELIANCE ON THESE HYPOTHETICAL PERFORMANCE RESULTS. This composite performance records are hypothetical and are used as a guide for position tracking purposes. Execution prices are an average execution price of the first ten trades recorded after advice has been posted and commonsense. In the event less than 10 trades are executed, prices will be determined by looking at fills, in relation to when the advice was given to clients, and a commonsense price will be determined. If no trades are executed, prices are determined by looking at a 1 min chart to determine the tracking price. The closing price on the previous day is used to determine the P/L listed in the Morning Comments and are net of average round turn commissions of \$33.00 for futures and \$36 for options and round turn fees of \$5.34 for grains and \$5.50 for livestock (these fees may change at any time by the CME). One of the limitations of a hypothetical composite performance records is that client decisions relating to the recipient's advice may or may not elect to act upon such advice and timing of execution by clients of advice may create a difference in the execution price represented in the matrix below. Therefore, composite performance records may differ which may materially affect trading results.
